Process for positive COVID Rapid Antigen test
(Result obtained at SJISD)

1. If BinaxNOW test is positive, have student wear a face mask and wait in an isolated area to be picked up by parent/guardian.

2. Ask student if they have been experiencing any COVID symptoms.

3. Close off the area where testing was done and isolation took place until it can be cleaned and wiped down by a custodian and left to rest for 20 minutes.

4. Record test result on Testing and Reporting Spreadsheet in Google Docs and share document electronically with San Juan County Department of Health.

5. Inform parent of positive test result and to follow-up with care provider to confirm test result with a PCR test and/or to quarantine for 10 days. Student may return to school if follow-up test is negative and symptoms have improved.
